I. Catalog Description

Dreamweaver CS6 Fundamentals provides web designers with the knowledge and hands-on practice they need to build and manage professional websites using Dreamweaver CS6

II. Course Objectives

Upon satisfactory completion of this course the student will be able to take control of a site by properly naming and structuring files and folders; how to create new documents and web pages from scratch or with starter pages; and how to add content such as text, images, tables, and links. The course will provide a background on the languages that power projects built in Dreamweaver—HTML and CSS—and will introduce the programming features in the application. The course will explain how to develop cross-browser compatible web sites utilizing the enhanced capabilities of the HTML5 and CSS3 specifications.

III. Evaluation

The Knowledge and skills stated in the objectives must be demonstrated by the students in the form of tests and assignments in order to complete the course. Letter grades will be as follows.
